Hello Julie,

After looking at the liquor store sign in Vergas, I believe we can either go with a 3' X 4' or a 3' X 5' digital sign. We will remove the old sign cabinet, and put angle iron supports across the 2 square posts, currently in place. Then we will install a new digital sign of your choice.

I have quoted double faced, digital signs by Watchfire. These are both 16mm signs, with Ignite Software by Watchfire, a long range wireless point to point radio, a temperature sensor, and on-line training by Watchfire.

If you go with the double faced 3' X 4' digital sign, your cost for this sign installed is \$ 14,445.00 plus tax, permit fees, and final electrical hookup, as needed.

If you go with the double faced 3' X 5' digital sign, your cost for this sign installed is \$ 16,385.00 plus tax, permit fees, and final electrical hookup, as needed.

I hope this is helpful Julie, and not confusing. Please let me know if you have any questions, or let me know what else I do to help you with this project.

Thanks Julie,

Ed Trost
