- High Speeds, Average Speeds, 85th Percentile, Traffic Volume, etc.
- Bi-directional statistics
- Comprehensive data analysis in PDF and Excel format

★★★★★ Customer Testimonial

"We received our signs approximately two years ago. They were very easy to install and set up. Our community has been very receptive to the signs, and we have received a lot of positive feedback. We opted for the solar option. We have had zero problems with these units, and we have never seen the units not displaying a read out no matter what the weather conditions. We noticed a dramatic drop in speeding vehicles and complaints immediately following installation. We would highly recommend these signs." Marshal Robert Taylor, Dayton PD, IN
