This is an estimated cost to wire 240 volt electric hand dryers in the bathrooms at the park. It was found that there is not 240 volt at the breaker box where the bathroom originates from. This would need to be all redone on the pole. The wiring to the shower house is likely not large enough to run the hand dryers and would need to be re wired		2,899.98	2,899.98
