

Instant Alerts and System Control, RIGHT AT YOUR FINGERTIPS

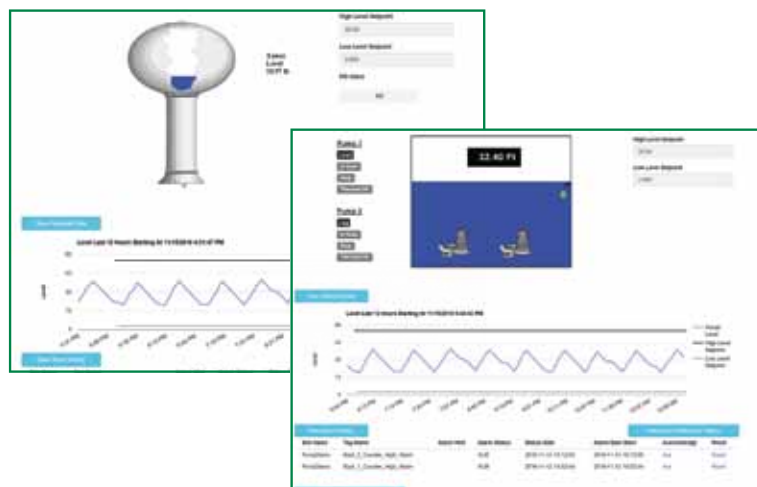

Insight™ By Sweeney Controls, a password protected, secure Cloud Based SCADA website, provides operators with real time notification of any alarm condition in text, email and/or phone call per operator preference.

Operators can access the dynamic screen via any internet connected device such as a smartphone, tablet or computer. Insight™ allows you to monitor your levels and adjust your setpoints through a graphical screen. Historical level and pump running information can be displayed as a graph and historical information is easily exportable into a spreadsheet system.
