

CEDA Information:

After visiting with the marketing team, we are comfortable completing the project at a cost not to exceed \$500. If this is something you are interested in, please let me know and I will have a contract sent over to you.

As far as an update on the funds received through the state program, the program is yet to be launched at the state level. I've connected with my CEDA colleague who is leading the CEDA portion of the program and expressed your interest in participating. When I know more, I will pass the information along to you.

An additional item to consider is having CEDA apply to the League of MN Cities Grant Navigator Program on behalf of the City of Vergas. This is a \$5,000 grant that the city could utilize to hire CEDA to explore grants for some of the projects the community would like to see completed. CEDA is willing to write the LMC application free of charge.
