

Engineering Update – August 2026

Blaine Green, PE, VP

Ongoing Items:

- Parking lot:
 - Project closeout, waiting on final documentation from contractor.
- Keilley Shores development
 - We've received a report from the developer's engineer that the pond still doesn't have the designed capacity, and is about 40% short of being within compliance. My recommendation is to still hold off on accepting the development until the storm pond situation is corrected.

Upcoming Items:

- West Lake Street
 - The City could pursue basic upgrades to the street, and early cost estimate would put the street costs around \$105,000 to improve safety from Glenn Street to Hwy 17.
 - LRIP – The City can resubmit an application for the Local Road Improvement Plan for West Lake Street, starting on September 1st, and due by November 25th, 2026.

On the radar:

- Project Priority List & Intended Use Plans (utilities)
 - Discuss at upcoming utility committee meeting
 - Identify system needs with staff
 - Develop a preliminary engineering report (PER)
- Street projects
 - Work with staff to identify needs

If you have any questions, you can give me a call at 320-335-5057, or email me at blaine.green@widseth.com

Thank you!
