City of Vergas Computer Use Policy

General Information

This policy serves to protect the security and integrity of the City's electronic communication and information systems by educating employees about appropriate and safe use of available technology resources.

Computers and related equipment used by City employees are property of the City. The City reserves the right to inspect, without notice, all data, emails, files, settings, or any other aspect of a City-owned computer or related system, including personal information created or maintained by an employee. The City may conduct inspections on an as-needed basis as determined by Council.

Beyond this policy, the Clerk-Treasurer may distribute information regarding precautions and actions needed to protect City systems; all employees are responsible for reading and following the guidance and directives in these communications.

Personal Use

The City recognizes that some personal use of City-owned computers and related equipment has and will continue to occur. Some controls are necessary, however, to protect the City's equipment and computer network and to prevent abuse of this privilege.

Reasonable, incidental personal use of City computers and software (e.g., word processing, spreadsheets, email, Internet, etc.) is allowed but should never preempt or interfere with work. All use of City computers and software, including personal use, must adhere to provisions in this policy, including the following:

- Employees shall not connect personal peripheral tools or equipment (such as printers, digital cameras, disks, USB drives, or flash cards) to City-owned systems, without prior approval from the Clerk-Treasurer. If permission to connect these tools/peripherals is granted, the employee must follow provided directions for protecting the City's computer network.
- Personal files should not be stored on City computer equipment. This also applies to personal media files, including but not limited to mp3 files, wav files, movie files, iTunes files, or any other file created by copying a music CD, DVD, or files from the Internet. Clerk-Treasurer will delete these types of files if found on the network, computers, or other City-owned equipment. Exceptions would be recordings for which the City has created, owns, purchased, or has a license.
- City equipment or technology shall not be used for personal business interests, forprofit ventures, political activities, or other uses deemed by the Council to be inconsistent with City activities. If there is any question about whether a use is appropriate, it should be forwarded to Clerk-Treasurer for a determination.

Hardware

In general, the City will provide the hardware required for an employee to perform his or her job duties. Requests for new or different equipment should be made to your supervisor, who will forward the request to Council.

City of Vergas

The City will not supply laptop computers based solely on the desire of employees to work offsite. Laptops will only be issued to employees who have a documented business need for a laptop.

Only City staff may use City computer equipment. Use of City equipment by family members, friends, or others is prohibited.

Employees are responsible for the proper use and care of City-owned computer equipment. City computer equipment must be secured while off City premises; do not leave computer equipment in an unlocked vehicle or unattended at any offsite facility. Computer equipment should not be exposed to extreme temperature or humidity. If a computer is exposed to extreme heat, cold, or humidity, it should be allowed to achieve normal room temperature and humidity before being turned on.

Software

In general, the City will provide the software required for an employee to perform his or her job duties. Requests for new or different software should be made to your supervisor, who will forward the request to Council.

Employees shall not download or install any software on their computer without the prior approval of the Clerk-Treasurer. Exceptions to this include updates to software approved by Information Technology such as Microsoft updates, Adobe Reader, and Adobe Flash. Clerk-Treasurer may, without notice, remove any unauthorized programs or software, equipment, downloads, or other resources.

Electronic Mail: The City provides employees with an email address for work-related use. Some personal use of the City email system by employees is allowed, provided it does not interfere with an employee's work and is consistent with all City policies.

Employee emails (including those that are personal in nature) may be considered public data for both e-discovery and information requests and may not be protected by privacy laws. Email may also be monitored as directed by the City authorized staff and without notice to the employee.

Employees must adhere to these email guidelines:

- Never transmit an email that you would not want your supervisor, other employees, members, city officials, or the media to read or publish (e.g., avoid gossip, personal information, swearing, etc.).
- Use caution or avoid corresponding by email on confidential communications (e.g., letters of reprimand, correspondence with attorneys, medical information).
- Do not open email attachments or links from an unknown sender. Delete junk or "spam" email without opening it if possible. Do not respond to unknown senders.
- Do not use harassing language (including sexually harassing language) or any other remarks, including insensitive language or derogatory, offensive, or insulting comments or jokes.

Instant Messaging: Due to data retention concerns, the City does not provide employees with resources or tools to communicate by instant messaging (IM) when conducting City business. Employees are not allowed to use IM as a mechanism for personal communication through the City's computer network or when using City equipment, and are not allowed to download or install any IM software on their City computer.

Personal Devices: Employees may choose to use their own equipment to read or compose email or other City data as governed in this policy. Employees understand that by connecting their personal equipment to the City's email server, their personal devices could be searched during an e-discovery or other court-ordered scenarios, and agree to grant access to their personal devices should such a situation arise.

Security

Passwords: Employees are responsible for maintaining computer/network passwords and must adhere to these guidelines:

- Passwords must be at least eight characters long and include at least three of the following: lowercase character; uppercase character; and a number or non-alphanumeric character (e.g., *, &, %, etc.). (Example: J0yfu11y!) Password requirements may be changed as necessary.
- Passwords should not be shared or told to other staff.
- Passwords should not be stored in any location on or near the computer.

Internet

The following considerations apply to all uses of the Internet:

- Information found on the Internet and used for City work must be verified to be accurate and factually correct.
- Reasonable personal use of the Internet is permitted. Employees may not at any time
 access inappropriate sites. Some examples of inappropriate sites include but are not
 limited to adult entertainment, sexually explicit material, or material advocating
 intolerance of other people, races, or religions. If you are unsure whether a site may
 include inappropriate information, you should not visit it.
- The City may monitor or restrict any employee's use of the Internet without prior notice, as deemed appropriate by the Council.

Data Retention

Electronic data should be stored and retained in accordance with the City's records retention schedule.

Storing and Transferring Files: If you are unsure whether an email or other file is a government record for purposes of records retention laws or whether it is considered protected or private, check with your supervisor. If you are unsure how to create an appropriate file structure for saving and storing electronic information, contact the Clerk-Treasurer.

Employees must adhere to these guidelines when transferring and storing electronic files:

• The City will back up documents stored on local computer hard drives. Files may be temporarily stored on a laptop hard drive when an employee is traveling/offsite; however, the files should be copied to local computer as soon as possible.

- Electronic files, including emails and business-related materials created on an employee's home or personal computer for City business, must be transferred to and stored on the City's. City-related files should not be stored on an employee's personal computer, unless otherwise defined in this policy.
- All removable storage media (e.g., CD-ROM, flash or USB drive, or other storage media) must be verified to be virus-free before being connected to City equipment.
- Email that constitutes an official record of City business must be kept in accordance with all records retention requirements for the department and should be copied to the network for storage.
- Email that is simple correspondence and not an official record of City business should be deleted (from both the "Inbox" and the "Deleted" box) as soon as possible and should not be retained by employees for more than three months. The City will not retain emails longer than one year on the network or in network back-ups.
- Electronic files or emails that may be classified as protected or private information should be stored in a location on the City's network that is properly secured.
- Any files considered private or confidential should not be stored anywhere other than the City's network. If there is a need to take confidential information offsite, it must be stored on encrypted media.

Employee signature

I have received and read the above policy and have had an opportunity to ask any questions. I understand that my failure to follow this policy may result in disciplinary action, including revocation of system privileges or termination.
